

COMPOSICIÓN: 65% PET SEAQUAL FIBER - 35% PES RECYCLED

BLANCO-00

CRUDO-12

FUXIA-23

GRIS-10

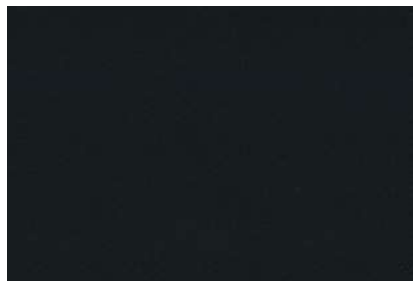

AZUL DUKE-3

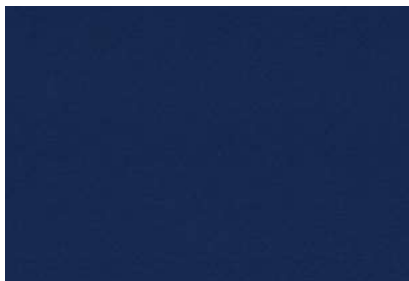

ROJO-18

SEAQUAL 06

NEGRO-13

MARINO-15

Pollution by plastics in the seas and oceans of the planet is an increasingly serious problem. Each year 8 million tons of plastic go to them, contaminating and depleting our most important natural resource.

This level of waste and pollution can not continue. That is why an increasingly large fleet of fishermen gathers from the Atlantic Ocean and the Mediterranean Sea the plastic trapped by their nets.

The collected waste is separated, sorted and recycled in specialized plants transforming it into PET pellets, which are subsequently used to manufacture the high quality yarn present in this fabric.
